1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

2. The use of the trademark Velcro on page 5 of the specification has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

3. While applicant may be his or her own lexicographer, a term in a claim may not be given a meaning repugnant to the usual meaning of that term. See *In re Hill*, 161 F.2d 367, 73 USPQ 482 (CCPA 1947). The term "fussy" in claim 10 is used by the claim to mean "fuzzy," while the accepted meaning is "difficult to satisfy." The word "fussy" is also employed in the specification at page 5 in an indefinite manner, and should be corrected.

4. The abstract of the disclosure is objected to because in line 2, biased is misspelled. Correction is required. See MPEP § 608.01(b).

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 2, "self erecting" should be hyphenated. In lines 19-20, "said free end portion" should be --said narrow free end portion-- to be consistent with other instances where it is employed to show that the same structure is being consistently referred to.

In claim 5, line 4, "said crosswise position" lacks antecedent basis.

In claim 7, line 2, "self erecting" should be hyphenated. In line 13, "trapezoidal shaped" should be hyphenated. In lines 18, 20 and 22-23, "said free end portion of said pivotal board" lacks antecedent basis.

In claim 10, lines 2 (twice) and 3, "fussy" is indefinite as to its meaning.

In claim 12, line 1, "self erecting" should be hyphenated. In line 3, "said elastic cord" is indefinite, as two different elastic cords have been defined.

7. Claims 1-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are display stands with trays or elastic cords.
